

GRADUATE CENTER WIRELESS NETWORKS

ABOUT GC WIRELESS NETWORKS:

There are two wireless networks at the Graduate Center, ***GCcommunity*** and ***GC guest***.

The ***GCcommunity*** wireless network is intended for use by Graduate Center students, faculty, and staff; it provides access to internal Graduate Center resources similar to those available on the wired network. This includes internal websites, printing, and network file shares. The ***GCguest*** wireless network is for use by guests and visitors to the Graduate Center; it provides access to the Internet via the web and other selected standard protocols; peer-to-peer file sharing is not permitted. Access to internal Graduate Center network resources for ***GCguest*** users is available via Graduate Center Remote IT Services (Citrix).

ACCESSING WIRELESS NETWORKS:

GCcommunity: Graduate Center students, faculty, and staff can use the *GCcommunity* wireless network, which is secured and encrypted. Connecting to *GCcommunity* requires your current Graduate Center network user-id and password. The first time you connect, some configuration of your computer, smartphone, or other wireless device will be required. Instructions for configuring a wireless profile at the Graduate Center are available from Information Technology at help.gc.cuny.edu/portal/ss/index.jsp.

GCguest: Graduate Center visitors and guests can use the *GCguest* wireless network, which is unsecured and unencrypted. No special configuration of your computer is required. Once you are connected, open a web browser and browse to any web page. You will then be directed to an authentication page; then enter any valid e-mail address and accept the terms of use.

Any questions about Wireless at the Graduate Center, as with any computing network questions, should be directed to the Information Technology Help Desk on the second floor of the library, at 212-817-7300, or at helpdesk@gc.cuny.edu
